

Chartered Accountant

FF05 Finance, control and administration · ISCO-08 2411 · CBS 0411 Accountants · seniority senior · Also known as: Certified Public Accountant, External Auditor

Audits or compiles annual accounts, issues an opinion or report and advises companies on reporting, taxation and internal control.

The accountant is ultimately responsible for file quality and works within professional rules, quality systems and supervision. Unlike the controller, the accountant gives an opinion from outside the company and is not involved in day to day steering. Selection typically stalls on technical reporting knowledge as the main criterion, while the role depends on holding a position against a client who matters commercially.

5 Behavioural anchors per skill

Anchors sit at N1, N3 and N5. N2 and N4 are deliberately not anchored: raters interpolate between them, following the O*NET convention.

Skill	N1	N3	N5
Quantitative interpretation Explains what figures, charts and key indicators mean for the question at hand and states what they do not show.	Reads a standard report and names which values lie above or below the agreed norm.	Translates monthly figures into three concrete findings, names the measurement uncertainty and warns when numbers are too small.	Decides which key indicators steer the organisation, demonstrates the pitfalls in the measurement and corrects improper use of figures.
Accuracy and attention to detail Works carefully, checks own work for errors and keeps to agreements about completeness and correctness of data.	Goes through the own work with a checklist and repairs errors found before the work is passed on.	Builds check moments into the own process, keeps track of errors and prevents repetition by adjusting the method.	Sets the standards for completeness and correctness, has samples checked and addresses teams on structural sloppiness.

Skill	N1	N3	N5
independence Forming and maintaining an own position on the basis of own judgement, even when the environment or an authority expects something different.	Forms an own opinion on a familiar issue and compares it with the advice of a colleague.	Takes a decision that departs from the group line, explains the reasoning behind it and accepts the consequences.	Protects own professional judgement against pressure from stakeholders in senior forums and makes dissenting positions traceable and explainable.
Financial administration Processes purchase, sales and bank entries in the accounting system, reconciles ledger accounts and delivers an auditable administration.	Posts purchase invoices to the correct ledger account under supervision and refers unclear items to the accountant.	Independently closes the monthly administration, explains differences between subledger and general ledger and corrects incorrect entries.	Designs the layout of the administration and the chart of accounts and sets guidelines for processing and control.
Preparing annual accounts Prepares the annual accounts with balance sheet, income statement and notes according to reporting rules and substantiates valuations and provisions.	Collects the substantiation for balance sheet items under guidance and processes the correction entries provided.	Independently prepares the annual accounts of a medium sized entity and justifies valuation choices to the auditor.	Determines the organisation's reporting policy, decides on complex valuation questions and defends them with regulators.
Audit and internal control Tests whether processes and records comply with rules and internal control, gathers evidence and reports findings with recommendations.	Carries out control steps under supervision according to the audit programme and records the evidence found in an orderly way.	Independently designs an audit approach for a high risk process, weighs the evidence and formulates substantiated findings.	Determines the organisation's annual audit plan and control standards and accounts for the outcomes to the board or council.
Numerical reasoning Works with numbers, ratios and tables and draws conclusions from them about quantities, trends and relationships in numerical material.	Reads a simple table, names the highest and lowest value and calculates a percentage using a calculator.	Combines two data sources, calculates the development over time and explains which calculation step leads to which result.	Sees in complex number series which assumptions determine the outcome and sets the calculation logic that others in the organisation follow.
integrity and dependability Acting in line with applicable standards and agreements, also without supervision, and being transparent about own interests, mistakes and doubtful cases.	Keeps to agreements and rules of conduct made and reports an own mistake to the manager.	Reports a possible conflict of interest on own initiative and asks for review before a decision is taken.	Sets the organisation's integrity standards, enforces them also with influential parties and explains the resulting choices publicly.

Skill	N1	N3	N5
Spreadsheets and worksheets Builds worksheets with formulas, references and pivot tables, checks outcomes and presents figures understandably in tables and charts.	Enters data in an existing worksheet and uses simple formulas such as sum and average as instructed.	Builds a worksheet with linked formulas and pivot tables, checks for errors and explains the calculation logic to colleagues.	Sets the standards for calculation models in the organisation and judges whether models are reliable enough for decision making.
Reading and interpreting financial reports Reads balance sheet, profit and loss account and cash flow statement and derives from these how an organisation or unit stands financially.	Points out the revenue, cost and result items in a periodic report and names the period used.	Compares reports across several periods, calculates ratios and names which items explain the deviation.	Assesses annual accounts and management reports of the organisation, sets the reporting standard and advises the board on it.
Complying with sector regulation Knows the laws, standards and supervisory requirements of the own sector and organises the own work and records accordingly.	Works according to the applicable sector rules and checks which rule applies to a new situation.	Translates changed regulation into the own work instructions and checks whether the records meet the requirements.	Tracks regulation for the whole organisation, drafts policy when requirements change and holds the dialogue with the supervisor.
Business reporting Bringing findings, figures and recommendations together in a report that leads the reader to a decision or next step in one reading.	Fills in an existing report template with the correct figures and describes per section what has been done.	Builds a report from question to conclusion, separates fact from interpretation and phrases recommendations with a named owner.	Sets the reporting line for the whole organisation, tests the quality of steering information and accounts for outcomes to board and regulator.
Advisory skill Sharpening the question of a client and delivering a well founded recommendation in a way that the receiver adopts and implements it.	Supplies requested information and explains a standard recommendation following the fixed structure used by the team.	Reframes the question behind the question, offers two supported options with consequences and agrees a decision moment.	Advises the board on issues with conflicting interests, challenges established assumptions and safeguards the quality of advice across the organisation.
Problem analysis Breaks a problem into parts, separates causes from effects and states which information is needed to move forward.	States precisely what deviates in a malfunction and which data are missing, and puts this to the supervisor.	Splits a recurring complaint into possible causes, tests these with own data and names the most likely cause.	Traces persistent organisational problems back to a few root causes and sets the analysis method that other teams will use.

Skill	N1	N3	N5
Methodical working Follows a fixed and traceable method for tasks, with steps, documentation and checks, so that others can repeat the work.	Completes the steps of a prescribed procedure in the right order and records the result.	Chooses a suitable method for a new task, records the steps and sticks to them under time pressure.	Writes the working methods for the field, has them tested in practice and revises them at fixed moments.
Risk management Identifying risks in work, projects or policy, weighing likelihood and impact, choosing control measures and periodically testing whether those measures work.	Reports unsafe or risky situations in the own work through the agreed reporting route.	Draws up a risk list with likelihood, impact and measure per risk and reviews it periodically with those involved.	Builds the risk framework of the organisation, sets risk appetite with the executive team and reports on it to the supervisory body.
Discipline and keeping commitments Sticks to agreements, procedures and commitments even without supervision, and reports in good time when a commitment turns out to be unachievable.	Arrives at the agreed time with the agreed work and reports any delay to the supervisor.	Commits only to what is feasible, tracks own commitments and informs those involved as soon as a deadline comes under pressure.	Anchors the standard for reliable follow through in working agreements and addresses anyone at any level who lets that standard slip.
Reporting and dashboard building Builds recurring reports and dashboards that show the right indicators for an agreed audience and keeps their definitions up to date.	Fills an existing dashboard or report template with current figures and checks the display for errors.	Designs a dashboard together with the user, chooses indicators and definitions and processes user feedback into new versions.	Determines which management information the organisation uses and keeps definitions unambiguous across all reporting.
Business case and investment analysis Substantiates a proposal with costs, benefits, assumptions and risks and calculates payback period and return for the decision makers.	Fills a standard business case template with supplied figures and names which data are still missing.	Builds an own business case with scenarios, makes the assumptions explicit and defends the outcome in the meeting.	Sets the calculation rules and threshold values for investments and weighs the entire investment portfolio of the organisation.
Invoicing and accounts receivable Creates and sends invoices, follows up outstanding items and takes steps on late payment up to handover to debt collection.	Creates invoices according to the assignment data and checks address, amount and payment term before sending.	Manages the outstanding items, follows up arrears by telephone and agrees payment schemes within the established policy.	Sets the credit and dunning policy of the organisation and decides on write offs and further legal steps.

Skill	N1	N3	N5
Applying basic tax knowledge Knows the main rules of value added tax, payroll tax and corporate income tax and applies these to invoices, filings and simple tax questions.	Puts the correct value added tax rate on an invoice and refers questions about deviating cases to the finance department.	Prepares the periodic value added tax return, checks the reconciliation with the ledger and corrects incorrect bookings.	Determines the tax approach of the organisation, consults the tax authority and advises the board on tax risks.
Applying legislation Applies laws, decrees and policy rules to individual cases, weighs exceptions and records the reasoning behind the decision.	Applies the fixed decision rules to a standard case and refers doubtful cases to an experienced case handler.	Independently assesses an application with exceptional circumstances, weighs discretionary room and motivates the decision traceably.	Sets policy rules and work instructions for implementation and decides on application questions that set precedent.
Budgeting and cost control Draws up a budget for a task, team or project, tracks spending against that budget and intervenes when overspending threatens.	Tracks spending in the supplied overview and reports deviations above the agreed limit.	Makes the budget for an own project, follows realisation per period and proposes measures in case of deviation.	Sets the budget framework for the organisation, decides on reallocation of resources and accounts for it to the board.
Controlling and management information Builds budgets, forecasts and reports, analyses differences between budget and actuals and explains them to management.	Fills the report with figures from the system under guidance and checks that the totals reconcile.	Independently analyses budget variances, traces them to operational causes and advises the manager on adjustment.	Determines the organisation's steering information, develops the planning and control toolkit and tests investment proposals for soundness.
Managing workload pressure Keeps an overview when the volume of work rises, chooses what goes ahead and what does not, and puts the consequences to stakeholders.	Tells the supervisor that the work does not fit the available time and follows the choice that is made.	Cuts or shifts tasks independently when busy on the basis of importance, records this and discusses consequences with clients.	Redistributes work and capacity across departments in cases of structural overload and sets norms for sustainable workload distribution.
Process automation Analyses a recurring work process, builds or commissions automation of its steps and checks that the outcome stays reliable.	Runs an existing automation and reports when the outcome differs from what was expected.	Describes a process in steps, automates the repeatable steps and builds in checks on errors and exceptions.	Determines the organisation's automation agenda and decides which processes are and are not automated.

6 Assessment methods and validity

The validities are the corrected meta-analytic estimates from Sackett, Zhang, Berry and Lievens (2022) in the Journal of Applied Psychology, which replace the older Schmidt and Hunter (1998) figures. The spread matters as much as the mean: with a high SD, validity varies strongly by context.

Assessment method	rho	SD	What it is
Werkproef	0.33	0.09	The candidate performs a representative work sample under standardised conditions.
Persoonlijkheidsvragenlijst	0.21	0.15	Self-report of behavioural preferences. At hrmforce the Big Fifty and the 15PF.
Kennistoets	0.40	0.13	Test of declarative job knowledge, usually assembled per client.
Cognitieve capaciteitentest	0.31	0.14	Standardised test of verbal, numerical or abstract reasoning.
Assessment center	0.29	0.09	Multiple exercises, multiple assessors, dimension-wise scoring.
Praktijkobservatie	-	-	Structured workplace observation with a form based on behavioural anchors.
Structureerd interview	0.42	0.19	Behaviour-based interview with fixed questions and a rating scale per question.

7 Assessment instruments for this job

hrmforce instrument	Skills	What it measures
Kennistoets (klantspecifiek)	13	Toets van vakkennis, per klant samengesteld
Werkproef	12	Representatief werkfragment onder gestandaardiseerde condities
Competency Check	6	Competentiebeoordeling op gedragsniveau
Big Fifty	4	Persoonlijkheidsvragenlijst, 150 items, 25 factoren
Ability Scan	3	Capaciteitentest: verbaal, numeriek en abstract redeneervermogen
360 Feedback	3	Meervoudige beoordeling op gedragsankers
Portfolio	3	Beoordeling van eerder werk tegen vaste criteria
15PF	2	Persoonlijkheidsprofiel, korter alternatief voor de Big Fifty
Structureerd interview	2	Gedragsgericht interview met vaste opzet

Big Fifty (schaal Integriteit)	1	
Pulse Survey	1	Periodieke meting op team- en organisatieniveau

8 How to use this profile

1. Agree the profile with the hiring manager before the first candidate is measured. Weights shifted afterwards make the outcome indefensible.
2. Choose the assessment method per skill from the Assessment method column. Combine at most three methods per candidate.
3. Calibrate the assessors in a two-hour session using the anchors in chapter 5. Anchors without rater training deliver little.
4. Fill in the match calculator and discuss the gaps in the development conversation. Type A and type G are selection criteria, not one-quarter development goals.
