

Chief Data Officer

FF08 Data, analytics and AI · ISCO-08 1330 · CBS 0533 Managers ICT · seniority lead · Also known as: CDO, Chief Data and Analytics Officer, Head of Data

Sets the data strategy of an organisation, establishes governance and teams and accounts for the return on data use to the executive board.

The chief data officer sets direction for data and AI across the organisation and is accountable for both return and compliance. Unlike the data architect, the issue is not technical design but mandate, budget, priorities and the assignment of ownership. Selection often rewards professional reputation, while this role stalls on change capability: without support in the line, a data strategy stays a document and departments keep using their own figures and definitions.

Key figures for this profile

27 skills · 3 competencies to measure · 5 knockout skills · centre of gravity: Digital, data and AI 49%, Cognitive ability and problem solving 15%, Leadership and organising 14%

1 Competencies to measure

These are the behavioural and ability constructs in this profile. Each one shows which hrmforce questionnaire measures it.

Competencies to measure	Target level	hrmforce instrument	Assessment method	Behavioural anchor at target level
Numerical reasoning Knockout	 N5	Ability Scan	Cognitieve capaciteitentest	Sees in complex number series which assumptions determine the outcome and sets the calculation logic that others in the organisation follow.
Curiosity and exploring Competency (50-framework): Leervermogen	 N4	Big Fifty, 15PF, Motivatie	Persoonlijkheidsvragenlijst	Gathers information on new methods outside the own team and brings findings into the work meeting unprompted.
Dealing with ambiguity Competency (50-framework): Flexibiliteit	 N4	Big Fifty, Mentale Weerbaarheid (4C), Competency Check	Situational Judgement Test	Formulates explicit assumptions when information is missing, proceeds on that basis and revises the approach once new data arrives.

2 Full skill profile

Every skill in this profile, sorted by weight. The behavioural anchor under each skill belongs to the target level.

T	Skill	Target level	Weight	Knockout	Assessment method	hrmforce instrument
A	Numerical reasoning Sees in complex number series which assumptions determine the outcome and sets the calculation logic that others in the organisation follow.	■■■■■N5	5	yes	Cognitieve capaciteitentest	Ability Scan
V	Stakeholder management Maintains a network reaching governance and political bodies, connects parties with differing interests and safeguards the position of the organisation.	■■■■■N5	5	no	Assessment center	Competency Check, 360 Feedback

T	Skill	Target level	Weight	Knockout	Assessment method	hrmforce instrument
V	Strategic thinking Develops scenarios for the whole organisation, weighs uncertainties explicitly and sets the strategic agenda together with the executive board.	■■■■■N5	5	no	Assessment center	Ability Scan, Competency Check
V	Change management Leads organisation wide change programmes, aligns with works council and supervisors and sets the change approach of the organisation.	■■■■■N5	5	no	Assessment center	Competency Check, 360 Feedback
K	Basic statistical interpretation Reviews the statistical basis of organisation wide decisions and trains others in the correct interpretation of results.	■■■■■N5	5	yes	Kennistoets	Ability Scan, Kennistoets (klantspecifiek)

T	Skill	Target level	Weight	Knockout	Assessment method	hrmforce instrument
V	Data governance and ownership Establishes the organisation's data governance model and holds executives to their role as owners of data.	 N5	5	yes	Structureerd interview	Structureerd interview, Portfolio
V	AI governance and responsible use Tests intended AI use against policy and legislation, records the trade off and arranges human oversight of decisions.	 N4	5	no	Kennistoets	Kennistoets (klantspecifiek), Structureerd interview
V	Critical thinking and source evaluation Sets the assessment criteria for sources and claims, including for texts made by artificial intelligence, and enforces them organisation wide.	 N5	4	no	Werkproef	Competency Check, Werkproef

T	Skill	Target level	Weight	Knockout	Assessment method	hrmforce instrument
V	Visual communication and data storytelling Sets guidelines for visualisation and dashboard use across the organisation and judges whether displayed figures represent reality fairly.	■■■■■N5	4	no	Werkproef	Werkproef, Portfolio
K	Governance and compliance Draws up the governance framework of the organisation, defines mandates and oversight arrangements and accounts for compliance to external supervisors.	■■■■■N5	4	no	Kennistoets	Kennistoets (klantspecifiek)
V	Assessing data quality Establishes the data quality framework for the entire organisation and decides which sources count as reliable.	■■■■■N5	4	yes	Werkproef	Werkproef, Kennistoets (klantspecifiek)

T	Skill	Target level	Weight	Knockout	Assessment method	hrmforce instrument
V	Reporting and dashboard building Determines which management information the organisation uses and keeps definitions unambiguous across all reporting.	 N5	4	no	Werkproef	Werkproef, Portfolio
V	Data modelling Sets the organisation's modelling standards and core data model and decides on deviations from them.	 N5	4	no	Werkproef	Kennistoets (klantspecifiek), Werkproef
K	Machine learning fundamentals Explains how a model is trained and validated and judges whether reported performance figures are credible.	 N4	4	no	Kennistoets	Kennistoets (klantspecifiek)

T	Skill	Target level	Weight	Knockout	Assessment method	hrmforce instrument
V	Data analysis Selects analysis methods for an open question, turns raw data into a working file and supports every conclusion with figures.	 N3	4	yes	Werkproef	Ability Scan, Werkproef
V	Business case and investment analysis Sets the calculation rules and threshold values for investments and weighs the entire investment portfolio of the organisation.	 N5	3	no	Werkproef	Werkproef, Kennistoets (klantspecifiek)
V	Systems thinking Maps the chain around a bottleneck, points out the feedback loop and predicts the effect of an intervention.	 N4	3	no	Werkproef	Competency Check, Werkproef

T	Skill	Target level	Weight	Knockout	Assessment method	hrmforce instrument
V	Methodical working Chooses a suitable method for a new task, records the steps and sticks to them under time pressure.		3	no	Praktijkobservatie	Competency Check, Werkproef
V	Advisory skill Reframes the question behind the question, offers two supported options with consequences and agrees a decision moment.		3	no	Assessment center	Competency Check, Structureerd interview
G	Curiosity and exploring Gathers information on new methods outside the own team and brings findings into the work meeting unprompted.		3	no	Persoonlijkheidsvragenlijst	Big Fifty, 15PF, Motivatie

T	Skill	Target level	Weight	Knockout	Assessment method	hrmforce instrument
V	Data management and storage Independently manages data collections, plans maintenance and recovery actions and tests whether a restore actually works.	 N4	3	no	Werkproef	Kennistoets (klantspecifiek), Werkproef
K	GDPR and privacy in practice Judges in own processes whether a legal basis exists, applies data minimisation and handles requests from data subjects correctly.	 N4	3	no	Kennistoets	Kennistoets (klantspecifiek)
V	Selecting and implementing AI applications Compares applications on requirements, risk and cost, runs a pilot and guides colleagues through adoption.	 N4	3	no	Structureerd interview	Structureerd interview, Portfolio

T	Skill	Target level	Weight	Knockout	Assessment method	hrmforce instrument
V	Recognising AI risk and bias Examines outcomes per group or situation, identifies where the system falls short and proposes measures or extra checks.	 N4	3	no	Werkproef	Kennistoets (klantspecifiek), Werkproef
V	multidisciplinary collaboration Maps the issue with specialists from different disciplines and formulates a joint approach with a clear division of roles.	 N4	2	no	Assessment center	360 Feedback, Competency Check
G	Dealing with ambiguity Formulates explicit assumptions when information is missing, proceeds on that basis and revises the approach once new data arrives.	 N4	1	no	Situational Judgement Test	Big Fifty, Mentale Weerbaarheid (4C), Competency Check

T	Skill	Target level	Weight	Knockout	Assessment method	hrmforce instrument
V	Programming Adjusts existing code as directed, runs it and reports error messages that cannot be resolved alone.	 N2	1	no	Werkproef	Werkproef, Kennistoets (klantspecifiek)

3 Levels per seniority

The same profile with the job family seniority adjustment applied. Target levels are clamped to 1 to 5.

Skill	lead
Numerical reasoning	N5
Stakeholder management	N5
Strategic thinking	N5
Change management	N5
Basic statistical interpretation	N5
Data governance and ownership	N5
AI governance and responsible use	N4

Recognising AI risk and bias	N4

Skill	lead
multidisciplinary collaboration	N4
Dealing with ambiguity	N4
Programming	N2

4 The proficiency scale

Level	Label	Autonomy	Complexity	Scope	Depth of knowledge
N1	Guided	works under supervision and follows instruction	routine, one variable at a time	own task	basic understanding of terminology
N2	Applying	works independently within set frameworks	familiar situations with limited variation	own role	working knowledge, applies standard approach
N3	Proficient	sets own approach and seeks input proactively	several variables, some ambiguity	own team or process	thorough knowledge, weighs alternatives
N4	Advanced	directs others and decides on the approach	complex, with conflicting interests	several teams or a department	in-depth knowledge, advises others
N5	Leading	sets the standard and the policy	strategic, under high uncertainty	organisation, value chain or profession	authority, advances the profession

5 Behavioural anchors per skill

Anchors sit at N1, N3 and N5. N2 and N4 are deliberately not anchored: raters interpolate between them, following the O*NET convention.

Skill	N1	N3	N5
Numerical reasoning Works with numbers, ratios and tables and draws conclusions from them about quantities, trends and relationships in numerical material.	Reads a simple table, names the highest and lowest value and calculates a percentage using a calculator.	Combines two data sources, calculates the development over time and explains which calculation step leads to which result.	Sees in complex number series which assumptions determine the outcome and sets the calculation logic that others in the organisation follow.
Stakeholder management Mapping who has an interest in an initiative and maintaining contact with those parties so that decisions keep their support.	Maintains a list of those involved and informs them about progress according to the agreed rhythm.	Assesses influence and interest per party, chooses a fitting form of contact and discusses conflicting wishes before a decision is taken.	Maintains a network reaching governance and political bodies, connects parties with differing interests and safeguards the position of the organisation.

Skill	N1	N3	N5
Strategic thinking Analysing developments in the environment, market and technology and deriving strategic choices and alternatives from them for the longer term of an organisation or unit.	Collects data on market and competitors on request and summarises the main developments for the manager.	Places figures, customer signals and trends side by side and names two or three strategic options with their consequences.	Develops scenarios for the whole organisation, weighs uncertainties explicitly and sets the strategic agenda together with the executive board.
Change management Planning and guiding change by involving stakeholders, phasing steps, influencing behaviour and tracking the results the change is meant to deliver.	Adapts own way of working to an announced change and asks for explanation when steps are unclear.	Makes a change approach for the team with those involved, chooses interventions per group and follows the implementation.	Leads organisation wide change programmes, aligns with works council and supervisors and sets the change approach of the organisation.
Basic statistical interpretation Knows and interprets basic statistical concepts such as spread, correlation, confidence interval and significance and states what an outcome does and does not show.	Reads mean, spread and counts correctly from a table and checks what a percentage exactly represents.	Interprets correlations, confidence intervals and significance in a report and points out where cause and effect are not established.	Reviews the statistical basis of organisation wide decisions and trains others in the correct interpretation of results.
Data governance and ownership Records who owns and stewards which data, which definitions apply and how decisions about data use are made.	Maintains the register of data owners and definitions as instructed and reports ambiguities to the coordinator.	Assigns ownership for a data domain, has definitions agreed and records decision making about data use traceably.	Establishes the organisation's data governance model and holds executives to their role as owners of data.
AI governance and responsible use Applies rules and agreements on permitted AI use, records where AI was used and ensures people remain accountable for decisions.	Uses AI only within permitted use, shares no confidential data and states where AI was used when this is required.	Tests intended AI use against policy and legislation, records the trade off and arranges human oversight of decisions.	Drafts the organisation's AI policy, sets up its oversight and accounts for it to regulators and clients.

Skill	N1	N3	N5
Critical thinking and source evaluation Tests claims for logic, evidence and the interest of the source and thereby distinguishes facts from opinions and assumptions.	Asks what a claim is based on and checks whether the source is named and can be found.	Detects fallacies and selective evidence in reports and states which conclusion the data do support.	Sets the assessment criteria for sources and claims, including for texts made by artificial intelligence, and enforces them organisation wide.
Visual communication and data storytelling Presenting figures and processes in charts, graphs and diagrams that support the message and lead the reader to the correct conclusion.	Creates a chart in an existing template, adds a title and names the unit shown on the axis.	Chooses a fitting chart type per message, removes unnecessary styling and writes the conclusion above the figure.	Sets guidelines for visualisation and dashboard use across the organisation and judges whether displayed figures represent reality fairly.
Governance and compliance Knowing which laws, codes of conduct and internal rules apply to the own field and how supervision, mandate and accountability are arranged in the organisation.	Names the main rules for the own work and looks up the applicable procedure when in doubt.	Tests intended working methods against law and internal rules and submits deviations with substantiation to the responsible officer.	Draws up the governance framework of the organisation, defines mandates and oversight arrangements and accounts for compliance to external supervisors.
Assessing data quality Checks data sets for completeness, accuracy, duplicates and timeliness, describes the defects found and determines whether the data is usable.	Works through a checklist on a supplied data set and reports missing or duplicate records to the person responsible.	Defines validation rules for a data source, quantifies the defects and advises whether the data is fit for use.	Establishes the data quality framework for the entire organisation and decides which sources count as reliable.
Reporting and dashboard building Builds recurring reports and dashboards that show the right indicators for an agreed audience and keeps their definitions up to date.	Fills an existing dashboard or report template with current figures and checks the display for errors.	Designs a dashboard together with the user, chooses indicators and definitions and processes user feedback into new versions.	Determines which management information the organisation uses and keeps definitions unambiguous across all reporting.
Data modelling Describes data and its relationships in a model with entities, attributes and keys that matches the work process.	Extends an existing data model with new fields following the applicable naming conventions and has the work reviewed.	Designs a logical data model for a defined domain, normalises where needed and discusses choices with users and developers.	Sets the organisation's modelling standards and core data model and decides on deviations from them.

Skill	N1	N3	N5
Machine learning fundamentals Knows the main forms of machine learning, the role of training data and concepts such as overfitting, validation and model performance in plain language.	States the difference between supervised and unsupervised learning and which data a model needs to learn.	Explains how a model is trained and validated and judges whether reported performance figures are credible.	Sets requirements for model development in the organisation and reviews third party models on design and evidence.
Data analysis Prepares and analyses data sets to find patterns, relationships and outliers and connects the outcomes to the original question.	Carries out a predefined analysis step on a supplied data set and records the outcome in the agreed format.	Selects analysis methods for an open question, turns raw data into a working file and supports every conclusion with figures.	Sets the organisation's analysis standards, reviews the analyses of others and establishes new analysis methods in the profession.
Business case and investment analysis Substantiates a proposal with costs, benefits, assumptions and risks and calculates payback period and return for the decision makers.	Fills a standard business case template with supplied figures and names which data are still missing.	Builds an own business case with scenarios, makes the assumptions explicit and defends the outcome in the meeting.	Sets the calculation rules and threshold values for investments and weighs the entire investment portfolio of the organisation.
Systems thinking Describes how parts of a process or organisation influence each other, including feedback, delay and unintended effects.	Names who or what depends on the own task earlier and later in the process.	Maps the chain around a bottleneck, points out the feedback loop and predicts the effect of an intervention.	Models the interplay between departments, market and regulation and shifts the intervention to the point with the greatest leverage.
Methodical working Follows a fixed and traceable method for tasks, with steps, documentation and checks, so that others can repeat the work.	Completes the steps of a prescribed procedure in the right order and records the result.	Chooses a suitable method for a new task, records the steps and sticks to them under time pressure.	Writes the working methods for the field, has them tested in practice and revises them at fixed moments.

Skill	N1	N3	N5
Advisory skill Sharpening the question of a client and delivering a well founded recommendation in a way that the receiver adopts and implements it.	Supplies requested information and explains a standard recommendation following the fixed structure used by the team.	Reframes the question behind the question, offers two supported options with consequences and agrees a decision moment.	Advises the board on issues with conflicting interests, challenges established assumptions and safeguards the quality of advice across the organisation.
Curiosity and exploring Asks questions about the unfamiliar, seeks out new topics and perspectives unprompted and explores them further than the work strictly requires.	Asks follow up questions during an explanation about a new topic and reads the background material provided.	Gathers information on new methods outside the own team and brings findings into the work meeting unprompted.	Explores developments outside the sector systematically, connects unexpected findings and puts new themes on the agenda of the organisation.
Data management and storage Manages storage, access and lifecycle of data collections, applies changes in a controlled way and ensures backups and recovery work.	Carries out assigned maintenance tasks on a data collection and records every change in the log.	Independently manages data collections, plans maintenance and recovery actions and tests whether a restore actually works.	Determines how data storage is organised for the organisation and decides on platforms, retention methods and continuity requirements.
GDPR and privacy in practice Knows privacy legislation requirements for own work, which legal basis and retention period apply and recognises when notification is required.	Processes personal data only according to the applicable work instruction and refers doubtful cases to the privacy officer.	Judges in own processes whether a legal basis exists, applies data minimisation and handles requests from data subjects correctly.	Sets privacy policy, decides on high risk processing operations and represents the organisation towards the supervisory authority.
Selecting and implementing AI applications Selects AI applications based on work need, cost, risk and fit with existing systems and guides adoption through to actual use.	Tests a designated AI application in own work and reports what proved usable and what did not.	Compares applications on requirements, risk and cost, runs a pilot and guides colleagues through adoption.	Determines which AI applications the organisation uses, decides on scaling up and accounts for the choices made.

Skill	N1	N3	N5
Recognising AI risk and bias Recognises where an AI system works systematically skewed or unreliably for groups or situations and names consequences and possible measures.	States that AI output can be skewed by the data used and refers striking outcomes to a colleague.	Examines outcomes per group or situation, identifies where the system falls short and proposes measures or extra checks.	Sets the assessment frameworks for AI fairness and risk and decides whether a system may remain in use.
multidisciplinary collaboration Working with people from other disciplines by learning their language and methods and establishing shared starting points for the joint work.	Asks a colleague from another discipline what technical terms mean and summarises the answer back to them.	Maps the issue with specialists from different disciplines and formulates a joint approach with a clear division of roles.	Sets up lasting forms of collaboration between disciplines and settles conflicts between professional standards on the basis of the organisational interest.
Dealing with ambiguity Works on when the assignment, information or division of roles is incomplete or contradictory, makes workable assumptions and tests them once more becomes clear.	Asks what is meant when an assignment is unclear and then works according to the answer given.	Formulates explicit assumptions when information is missing, proceeds on that basis and revises the approach once new data arrives.	Sets direction under high uncertainty, makes the remaining uncertainty explicit and keeps the organisation moving until a decision can be taken.
Programming Writes, reads and improves working program code in at least one language, splits a problem into steps and tests own solution.	Adjusts existing code as directed, runs it and reports error messages that cannot be resolved alone.	Independently builds a function or module from the requirement, chooses suitable structures and keeps the code readable and tested.	Sets programming standards and language choices for the organisation and reviews others' code for quality and maintainability.

6 Assessment methods and validity

The validities are the corrected meta-analytic estimates from Sackett, Zhang, Berry and Lievens (2022) in the Journal of Applied Psychology, which replace the older Schmidt and Hunter (1998) figures. The spread matters as much as the mean: with a high SD, validity varies strongly by context.

Assessment method	rho	SD	What it is
Cognitieve capaciteitentest	0.31	0.14	Standardised test of verbal, numerical or abstract reasoning.
Assessment center	0.29	0.09	Multiple exercises, multiple assessors, dimension-wise scoring.
Kennistoets	0.40	0.13	Test of declarative job knowledge, usually assembled per client.
Structureerd interview	0.42	0.19	Behaviour-based interview with fixed questions and a rating scale per question.
Werkproef	0.33	0.09	The candidate performs a representative work sample under standardised conditions.
Praktijkobservatie	-	-	Structured workplace observation with a form based on behavioural anchors.
Persoonlijkheidsvragenlijst	0.21	0.15	Self-report of behavioural preferences. At hrmforce the Big Fifty and the 15PF.
Situational Judgement Test	0.12	0.11	Scenario with response options, scored on knowledge or behavioural tendency.

7 Assessment instruments for this job

hrmforce instrument	Skills	What it measures
Werkproef	12	Representatief werkfragment onder gestandaardiseerde condities
Kennistoets (klantspecifiek)	11	Toets van vakkennis, per klant samengesteld
Competency Check	9	Competentiebeoordeling op gedragsniveau
Ability Scan	4	Capaciteitentest: verbaal, numeriek en abstract redeneervermogen
Structureerd interview	4	Gedragsgericht interview met vaste opzet
Portfolio	4	Beoordeling van eerder werk tegen vaste criteria
360 Feedback	3	Meervoudige beoordeling op gedragsankers

hrmforce instrument	Skills	What it measures
Big Fifty	2	Persoonlijkheidsvragenlijst, 150 items, 25 factoren
15PF	1	Persoonlijkheidsprofiel, korter alternatief voor de Big Fifty
Motivatatie	1	Drijfveren en motivatiebronnen
Mentale Weerbaarheid (4C)	1	Mentale weerbaarheid volgens het 4C-model

8 How to use this profile

1. Agree the profile with the hiring manager before the first candidate is measured. Weights shifted afterwards make the outcome indefensible.
2. Choose the assessment method per skill from the Assessment method column. Combine at most three methods per candidate.
3. Calibrate the assessors in a two-hour session using the anchors in chapter 5. Anchors without rater training deliver little.
4. Fill in the match calculator and discuss the gaps in the development conversation. Type A and type G are selection criteria, not one-quarter development goals.
