

Chief Financial Officer

FF05 Finance, control and administration · ISCO-08 1211 · CBS 0521 Managers zakelijke en administratieve dienstverlening · seniority lead · Also known as: Finance Director, CFO

Sets the financial policy of the company, holds ultimate responsibility for reporting, financing and risk control and accounts to shareholders and supervisory bodies.

The chief financial officer sits on the board and connects financing, strategy and control with the commercial and operational agenda. Unlike the finance manager, this role deals with external parties such as banks, investors and regulators and with the capital structure of the company. Selection often leans too heavily on a controlling background, while the role depends on negotiating with financiers and correcting fellow directors when a plan is not financially sustainable.

5 Behavioural anchors per skill

Anchors sit at N1, N3 and N5. N2 and N4 are deliberately not anchored: raters interpolate between them, following the O*NET convention.

Skill	N1	N3	N5
Quantitative interpretation Explains what figures, charts and key indicators mean for the question at hand and states what they do not show.	Reads a standard report and names which values lie above or below the agreed norm.	Translates monthly figures into three concrete findings, names the measurement uncertainty and warns when numbers are too small.	Decides which key indicators steer the organisation, demonstrates the pitfalls in the measurement and corrects improper use of figures.
Accuracy and attention to detail Works carefully, checks own work for errors and keeps to agreements about completeness and correctness of data.	Goes through the own work with a checklist and repairs errors found before the work is passed on.	Builds check moments into the own process, keeps track of errors and prevents repetition by adjusting the method.	Sets the standards for completeness and correctness, has samples checked and addresses teams on structural sloppiness.

Skill	N1	N3	N5
Strategic thinking Analysing developments in the environment, market and technology and deriving strategic choices and alternatives from them for the longer term of an organisation or unit.	Collects data on market and competitors on request and summarises the main developments for the manager.	Places figures, customer signals and trends side by side and names two or three strategic options with their consequences.	Develops scenarios for the whole organisation, weighs uncertainties explicitly and sets the strategic agenda together with the executive board.
Accounting to supervisors and stakeholders Explaining results, choices and incidents to a supervisory board, works council, clients or inspectorate, with facts, context and visible consequences for policy.	Supplies factual data for an accountability report and checks it for accuracy and completeness.	Presents team results to sponsor and works council, also names what failed and which steps will follow.	Accounts for organisational results and incidents to the supervisory board, media or politics and links visible policy adjustments to them.
Budgeting and cost control Draws up a budget for a task, team or project, tracks spending against that budget and intervenes when overspending threatens.	Tracks spending in the supplied overview and reports deviations above the agreed limit.	Makes the budget for an own project, follows realisation per period and proposes measures in case of deviation.	Sets the budget framework for the organisation, decides on reallocation of resources and accounts for it to the board.
Controlling and management information Builds budgets, forecasts and reports, analyses differences between budget and actuals and explains them to management.	Fills the report with figures from the system under guidance and checks that the totals reconcile.	Independently analyses budget variances, traces them to operational causes and advises the manager on adjustment.	Determines the organisation's steering information, develops the planning and control toolkit and tests investment proposals for soundness.
Risk management Identifying risks in work, projects or policy, weighing likelihood and impact, choosing control measures and periodically testing whether those measures work.	Reports unsafe or risky situations in the own work through the agreed reporting route.	Draws up a risk list with likelihood, impact and measure per risk and reviews it periodically with those involved.	Builds the risk framework of the organisation, sets risk appetite with the executive team and reports on it to the supervisory body.
Numerical reasoning Works with numbers, ratios and tables and draws conclusions from them about quantities, trends and relationships in numerical material.	Reads a simple table, names the highest and lowest value and calculates a percentage using a calculator.	Combines two data sources, calculates the development over time and explains which calculation step leads to which result.	Sees in complex number series which assumptions determine the outcome and sets the calculation logic that others in the organisation follow.

Skill	N1	N3	N5
integrity and dependability Acting in line with applicable standards and agreements, also without supervision, and being transparent about own interests, mistakes and doubtful cases.	Keeps to agreements and rules of conduct made and reports an own mistake to the manager.	Reports a possible conflict of interest on own initiative and asks for review before a decision is taken.	Sets the organisation's integrity standards, enforces them also with influential parties and explains the resulting choices publicly.
Governance and compliance Knowing which laws, codes of conduct and internal rules apply to the own field and how supervision, mandate and accountability are arranged in the organisation.	Names the main rules for the own work and looks up the applicable procedure when in doubt.	Tests intended working methods against law and internal rules and submits deviations with substantiation to the responsible officer.	Draws up the governance framework of the organisation, defines mandates and oversight arrangements and accounts for compliance to external supervisors.
Reading and interpreting financial reports Reads balance sheet, profit and loss account and cash flow statement and derives from these how an organisation or unit stands financially.	Points out the revenue, cost and result items in a periodic report and names the period used.	Compares reports across several periods, calculates ratios and names which items explain the deviation.	Assesses annual accounts and management reports of the organisation, sets the reporting standard and advises the board on it.
Business reporting Bringing findings, figures and recommendations together in a report that leads the reader to a decision or next step in one reading.	Fills in an existing report template with the correct figures and describes per section what has been done.	Builds a report from question to conclusion, separates fact from interpretation and phrases recommendations with a named owner.	Sets the reporting line for the whole organisation, tests the quality of steering information and accounts for outcomes to board and regulator.
Preparing annual accounts Prepares the annual accounts with balance sheet, income statement and notes according to reporting rules and substantiates valuations and provisions.	Collects the substantiation for balance sheet items under guidance and processes the correction entries provided.	Independently prepares the annual accounts of a medium sized entity and justifies valuation choices to the auditor.	Determines the organisation's reporting policy, decides on complex valuation questions and defends them with regulators.
Treasury and working capital management Manages liquidity, financing and payments, steers receivables, payables and stock and limits interest rate and currency risk.	Prepares the daily liquidity overview under guidance and flags payments that exceed the available headroom.	Independently builds a liquidity forecast, steers payment terms and raises the financing need in good time.	Determines the organisation's treasury policy, chooses the financing structure and hedges interest and currency risk with substantiated instruments.

Skill	N1	N3	N5
Problem analysis Breaks a problem into parts, separates causes from effects and states which information is needed to move forward.	States precisely what deviates in a malfunction and which data are missing, and puts this to the supervisor.	Splits a recurring complaint into possible causes, tests these with own data and names the most likely cause.	Traces persistent organisational problems back to a few root causes and sets the analysis method that other teams will use.
Methodical working Follows a fixed and traceable method for tasks, with steps, documentation and checks, so that others can repeat the work.	Completes the steps of a prescribed procedure in the right order and records the result.	Chooses a suitable method for a new task, records the steps and sticks to them under time pressure.	Writes the working methods for the field, has them tested in practice and revises them at fixed moments.
Advisory skill Sharpening the question of a client and delivering a well founded recommendation in a way that the receiver adopts and implements it.	Supplies requested information and explains a standard recommendation following the fixed structure used by the team.	Reframes the question behind the question, offers two supported options with consequences and agrees a decision moment.	Advises the board on issues with conflicting interests, challenges established assumptions and safeguards the quality of advice across the organisation.
Discipline and keeping commitments Sticks to agreements, procedures and commitments even without supervision, and reports in good time when a commitment turns out to be unachievable.	Arrives at the agreed time with the agreed work and reports any delay to the supervisor.	Commits only to what is feasible, tracks own commitments and informs those involved as soon as a deadline comes under pressure.	Anchors the standard for reliable follow through in working agreements and addresses anyone at any level who lets that standard slip.
Reporting and dashboard building Builds recurring reports and dashboards that show the right indicators for an agreed audience and keeps their definitions up to date.	Fills an existing dashboard or report template with current figures and checks the display for errors.	Designs a dashboard together with the user, chooses indicators and definitions and processes user feedback into new versions.	Determines which management information the organisation uses and keeps definitions unambiguous across all reporting.
Business case and investment analysis Substantiates a proposal with costs, benefits, assumptions and risks and calculates payback period and return for the decision makers.	Fills a standard business case template with supplied figures and names which data are still missing.	Builds an own business case with scenarios, makes the assumptions explicit and defends the outcome in the meeting.	Sets the calculation rules and threshold values for investments and weighs the entire investment portfolio of the organisation.

Skill	N1	N3	N5
Applying basic tax knowledge Knows the main rules of value added tax, payroll tax and corporate income tax and applies these to invoices, filings and simple tax questions.	Puts the correct value added tax rate on an invoice and refers questions about deviating cases to the finance department.	Prepares the periodic value added tax return, checks the reconciliation with the ledger and corrects incorrect bookings.	Determines the tax approach of the organisation, consults the tax authority and advises the board on tax risks.
Audit and internal control Tests whether processes and records comply with rules and internal control, gathers evidence and reports findings with recommendations.	Carries out control steps under supervision according to the audit programme and records the evidence found in an orderly way.	Independently designs an audit approach for a high risk process, weighs the evidence and formulates substantiated findings.	Determines the organisation's annual audit plan and control standards and accounts for the outcomes to the board or council.
Financial administration Processes purchase, sales and bank entries in the accounting system, reconciles ledger accounts and delivers an auditable administration.	Posts purchase invoices to the correct ledger account under supervision and refers unclear items to the accountant.	Independently closes the monthly administration, explains differences between subledger and general ledger and corrects incorrect entries.	Designs the layout of the administration and the chart of accounts and sets guidelines for processing and control.
Managing workload pressure Keeps an overview when the volume of work rises, chooses what goes ahead and what does not, and puts the consequences to stakeholders.	Tells the supervisor that the work does not fit the available time and follows the choice that is made.	Cuts or shifts tasks independently when busy on the basis of importance, records this and discusses consequences with clients.	Redistributes work and capacity across departments in cases of structural overload and sets norms for sustainable workload distribution.
Spreadsheets and worksheets Builds worksheets with formulas, references and pivot tables, checks outcomes and presents figures understandably in tables and charts.	Enters data in an existing worksheet and uses simple formulas such as sum and average as instructed.	Builds a worksheet with linked formulas and pivot tables, checks for errors and explains the calculation logic to colleagues.	Sets the standards for calculation models in the organisation and judges whether models are reliable enough for decision making.
Process automation Analyses a recurring work process, builds or commissions automation of its steps and checks that the outcome stays reliable.	Runs an existing automation and reports when the outcome differs from what was expected.	Describes a process in steps, automates the repeatable steps and builds in checks on errors and exceptions.	Determines the organisation's automation agenda and decides which processes are and are not automated.

6 Assessment methods and validity

The validities are the corrected meta-analytic estimates from Sackett, Zhang, Berry and Lievens (2022) in the Journal of Applied Psychology, which replace the older Schmidt and Hunter (1998) figures. The spread matters as much as the mean: with a high SD, validity varies strongly by context.

Assessment method	rho	SD	What it is
Werkproef	0.33	0.09	The candidate performs a representative work sample under standardised conditions.
Persoonlijkheidsvragenlijst	0.21	0.15	Self-report of behavioural preferences. At hrmforce the Big Fifty and the 15PF.
Assessment center	0.29	0.09	Multiple exercises, multiple assessors, dimension-wise scoring.
Kennistoets	0.40	0.13	Test of declarative job knowledge, usually assembled per client.
Cognitieve capaciteitentest	0.31	0.14	Standardised test of verbal, numerical or abstract reasoning.
Praktijkobservatie	-	-	Structured workplace observation with a form based on behavioural anchors.
Structureerd interview	0.42	0.19	Behaviour-based interview with fixed questions and a rating scale per question.

7 Assessment instruments for this job

hrmforce instrument	Skills	What it measures
Kennistoets (klantspecifiek)	12	Toets van vakkennis, per klant samengesteld

15PF	1	Persoonlijkheidsprofiel, korter alternatief voor de Big Fifty
Pulse Survey	1	Periodieke meting op team- en organisatieniveau

8 How to use this profile

1. Agree the profile with the hiring manager before the first candidate is measured. Weights shifted afterwards make the outcome indefensible.
2. Choose the assessment method per skill from the Assessment method column. Combine at most three methods per candidate.
3. Calibrate the assessors in a two-hour session using the anchors in chapter 5. Anchors without rater training deliver little.
4. Fill in the match calculator and discuss the gaps in the development conversation. Type A and type G are selection criteria, not one-quarter development goals.
