

Customer Service Representative

FF16 Customer service and administration · ISCO-08 4222 · CBS 0433 Klantenservice medewerkers en receptionisten · seniority junior · Also known as: Customer service agent, CSR

Answers customer questions by phone, email and chat, logs contact moments and resolves simple requests directly.

The customer service representative is the first point of contact and often works to fixed scripts and systems. The distinction from a client advisor lies in handling standard questions rather than tailored advice. Selection often fails on candidates who come across as friendly in conversation but cannot operate the systems fluently enough in a practical simulation.

5 Behavioural anchors per skill

Anchors sit at N1, N3 and N5. N2 and N4 are deliberately not anchored: raters interpolate between them, following the O*NET convention.

Skill	N1	N3	N5
Client focus Acting from the question and interest of the client, keeping agreements and visibly directing own work towards usefulness for that client.	Responds to client questions within the agreed term and refers on when the answer falls outside own task.	Uncovers the real need behind a client question, makes a fitting proposal and checks after delivery whether it works.	Translates client signals into changes in services and policy and holds the organisation accountable for the promised client experience.
Accuracy and attention to detail Works carefully, checks own work for errors and keeps to agreements about completeness and correctness of data.	Goes through the own work with a checklist and repairs errors found before the work is passed on.	Builds check moments into the own process, keeps track of errors and prevents repetition by adjusting the method.	Sets the standards for completeness and correctness, has samples checked and addresses teams on structural sloppiness.

Skill	N1	N3	N5
Service calls and telephone contact Handling client contacts by telephone and chat with a fixed structure, controlled questioning and a closing that contains a concrete agreement.	Answers according to the script, registers the question in the system and transfers the caller to the right colleague.	Settles unusual questions within a single call, keeps call time under control and audibly summarises the agreement made.	Designs conversation models and quality standards for the contact centre and reviews recordings to support coaching and system choices.
Working with digital devices and applications Uses computers, mobile devices and standard applications to carry out work tasks, adjusts settings and resolves simple usage problems without help.	Opens and uses the prescribed applications for own tasks and asks for help whenever an unfamiliar message appears.	Selects the appropriate device and application for each task and fixes common disruptions without support from others.	Defines organisation wide which digital workplace facilities are used and guides their introduction across all teams.
Dutch language proficiency at professional level Commanding Dutch in speech and writing at a level of the Common European Framework of Reference that matches the demands of the role.	Handles simple work conversations and reads short instructions at level A2 to B1 of the European reference framework.	Writes and discusses professional documents fluently at level B2 and adapts register to formal and informal situations.	Commands Dutch at level C1 to C2, edits publications written by others and uses professional and legal phrasing precisely.
Complaint handling Receiving a complaint, tracing its cause and reaching a solution that the client accepts and that prevents the error from recurring.	Records a complaint fully in the system, offers an apology and hands the file over according to procedure.	Calms an angry client, separates emotion from facts and offers a solution with a deadline within own mandate.	Handles escalated cases with legal or publicity risk and uses complaint analysis to change processes structurally.
Written client communication Answering clients in writing by email, chat and letter with a reply that covers the question and prevents follow up questions.	Uses approved reply templates, fills in client details correctly and has doubtful cases checked before sending.	Writes a tailored reply in plain language, explains a rejection and offers an alternative course of action.	Sets the writing tone and reply library for client communication and tests outgoing texts for legal soundness.
Stress tolerance Keeps delivering work of the same quality under time pressure, opposition or unexpected turns and maintains a businesslike tone with others.	Keeps working on the current task as pressure rises and asks the supervisor which task can wait.	Keeps working in a structured way at peak load, keeps agreements with clients clear and flags early which results are at risk.	Keeps the organisation workable in crises, takes decisions under high uncertainty and sets the standard for composed action under pressure.

Skill	N1	N3	N5
Information gathering and filtering Searches purposefully for data in several sources, selects what is relevant to the question and leaves other information out.	Looks up the requested data in the designated sources and delivers them in full and with source references.	Chooses sources independently for an open question, filters out duplicate and outdated data and justifies that choice.	Designs the information flows for the whole field, decides which sources are authoritative and cuts redundant reporting.
Expectation management Making clear in advance what the client will and will not get and when, and reporting in time as soon as that promise becomes unrealistic.	States the delivery time and conditions as recorded and reports any delay immediately to own manager.	Records at the start what falls outside the assignment and discusses deviations with the client before they become visible.	Sets service level agreements for the organisation, weighs feasibility against commercial interest and accounts for deviations to major clients.
de-escalating and setting limits Reducing rising tension or unwanted behaviour by staying calm, stating the limit clearly and steering or ending the conversation.	Stays calm when facing an angry reaction, lets the other person speak and calls in a colleague or manager.	States which limit is being crossed when behaviour is unwanted, what the consequence is, and ends the conversation when needed.	Establishes organisation-wide agreements on transgressive behaviour, arranges support and follow-up, and holds managers to that line.
Time management and prioritising Allocates available time across tasks by urgency and importance, sets a sequence and adjusts it when new work arrives during the period.	Follows a task list provided by others and asks which task takes priority whenever new requests arrive.	Ranks own work by urgency and importance, builds in buffer time and explains to others why an item will arrive later.	Sets prioritisation agreements and planning standards across the organisation and decides which work streams receive time and capacity when both are scarce.
Switching between tasks and roles Alternates between tasks, roles and counterparts within a working day and matches content, tone and pace to the situation at hand.	Switches task when instructed and uses the given work instruction per task without mixing in the previous task.	Switches independently between execution and consultation tasks, keeps notes per role and correctly resumes interrupted work.	Fills roles in several bodies with clashing interests at the same time and keeps role clarity visible for the organisation.
Retaining and applying knowledge Keeps acquired professional knowledge available, retrieves the right rule or procedure at the moment it is needed and applies it correctly at work.	Looks up the required procedure in the manual and follows it step by step on a familiar task.	Knows the rules of the own field by heart and applies them without reference material in varying situations.	Oversees the knowledge base of the whole domain, decides which knowledge must be secured and documents it for the organisation.

Skill	N1	N3	N5
Word processing and document management Creates and edits documents in word processing software, applies styles and templates and manages versions and findability of files.	Types and edits text in an existing template and saves the file in the designated location using the agreed name.	Builds documents using styles, references and a table of contents and keeps versions and folder structure orderly for the team.	Designs organisation wide templates and document conventions and decides how documents are recorded and archived.
GDPR and privacy in practice Knows privacy legislation requirements for own work, which legal basis and retention period apply and recognises when notification is required.	Processes personal data only according to the applicable work instruction and refers doubtful cases to the privacy officer.	Judges in own processes whether a legal basis exists, applies data minimisation and handles requests from data subjects correctly.	Sets privacy policy, decides on high risk processing operations and represents the organisation towards the supervisory authority.
Information management and archiving Manages documents and data according to archiving and retention rules, makes information findable and accounts for destruction and transfer.	Registers documents in the case system according to the metadata rules and reports items whose classification is unclear.	Independently assesses retention periods for a case file, arranges findability and carries out destruction demonstrably.	Sets the organisation's information policy and retention schedule and accounts for compliance to the archive inspectorate.
Spreadsheets and worksheets Builds worksheets with formulas, references and pivot tables, checks outcomes and presents figures understandably in tables and charts.	Enters data in an existing worksheet and uses simple formulas such as sum and average as instructed.	Builds a worksheet with linked formulas and pivot tables, checks for errors and explains the calculation logic to colleagues.	Sets the standards for calculation models in the organisation and judges whether models are reliable enough for decision making.
Invoicing and accounts receivable Creates and sends invoices, follows up outstanding items and takes steps on late payment up to handover to debt collection.	Creates invoices according to the assignment data and checks address, amount and payment term before sending.	Manages the outstanding items, follows up arrears by telephone and agrees payment schemes within the established policy.	Sets the credit and dunning policy of the organisation and decides on write offs and further legal steps.

Skill	N1	N3	N5
Managing service levels and performance indicators Agrees measurable service and performance standards, measures the actual results and takes action when agreed levels are not met.	Reads the performance overview and reports which agreement was not met in the past week.	Draws up indicators and standards for a service, reports per period and carries out improvement actions on deviation.	Determines the system of service levels for the organisation and negotiates these with customers and suppliers.
Prompting and task delegation to AI Divides work between person and AI system, formulates task, context and required output format and adjusts based on the output.	Gives an AI tool a single task with a clear question and required format and uses the result after checking it.	Splits a work task into steps, decides which step AI does and which not and improves the instruction based on outcomes.	Develops organisation wide practices for dividing tasks with AI and trains others in effective and responsible instruction giving.

6 Assessment methods and validity

The validities are the corrected meta-analytic estimates from Sackett, Zhang, Berry and Lievens (2022) in the Journal of Applied Psychology, which replace the older Schmidt and Hunter (1998) figures. The spread matters as much as the mean: with a high SD, validity varies strongly by context.

Assessment method	rho	SD	What it is
360 feedback	-	-	Multiple raters around the person rate behaviour against behavioural anchors.
Persoonlijkheidsvragenlijst	0.21	0.15	Self-report of behavioural preferences. At hrnforce the Big Fifty and the 15PF.
Werkproef	0.33	0.09	The candidate performs a representative work sample under standardised conditions.
Kennistoets	0.40	0.13	Test of declarative job knowledge, usually assembled per client.
Situational Judgement Test	0.12	0.11	Scenario with response options, scored on knowledge or behavioural tendency.
Structureerd interview	0.42	0.19	Behaviour-based interview with fixed questions and a rating scale per question.
Praktijkobservatie	-	-	Structured workplace observation with a form based on behavioural anchors.

7 Assessment instruments for this job

Ability Scan	1	Capaciteitentest: verbaal, numeriek en abstract redeneervermogen
Portfolio	1	Beoordeling van eerder werk tegen vaste criteria

8 How to use this profile

1. Agree the profile with the hiring manager before the first candidate is measured. Weights shifted afterwards make the outcome indefensible.
2. Choose the assessment method per skill from the Assessment method column. Combine at most three methods per candidate.
3. Calibrate the assessors in a two-hour session using the anchors in chapter 5. Anchors without rater training deliver little.
4. Fill in the match calculator and discuss the gaps in the development conversation. Type A and type G are selection criteria, not one-quarter development goals.
