

Psychometrician

FF08 Data, analytics and AI · ISCO-08 2634 · CBS 1022 Psychologen en sociologen · seniority senior · Also known as: Psychometrist, Assessment Scientist, Test Development Specialist

Develops and researches tests and questionnaires, establishes reliability and validity and sets norms for responsible use.

The psychometrician builds and maintains the measurement instruments behind selection and development advice, from item analysis to norming and testing for bias between groups. Unlike the data scientist, the subject is not behaviour in the data but the quality of the measurement itself, and unlike the assessment psychologist this role gives no individual advice. Selection looks at statistical background, while the failure point is explainability: an instrument must also be traceable and defensible for recruiters, works councils and candidates.

Key figures for this profile

27 skills · 4 competencies to measure · 6 knockout skills · centre of gravity: Digital, data and AI 59%, Cognitive ability and problem solving 15%, Communication and influence 7%

1 Competencies to measure

These are the behavioural and ability constructs in this profile. Each one shows which hrmforce questionnaire measures it.

Competencies to measure	Target level	hrmforce instrument	Assessment method	Behavioural anchor at target level
Numerical reasoning Knockout	 N5	Ability Scan	Cognitieve capaciteitentest	Sees in complex number series which assumptions determine the outcome and sets the calculation logic that others in the organisation follow.
independence Competency (50-framework): Onafhankelijkheid	 N5	Big Fifty, 15PF	Persoonlijkheidsvragenlijst	Protects own professional judgement against pressure from stakeholders in senior forums and makes dissenting positions traceable and explainable.
Curiosity and exploring Competency (50-framework): Leervermogen	 N4	Big Fifty, 15PF, Motivatie	Persoonlijkheidsvragenlijst	Gathers information on new methods outside the own team and brings findings into the work meeting unprompted.

Competencies to measure	Target level	hrmforce instrument	Assessment method	Behavioural anchor at target level
Dealing with ambiguity Competency (50-framework): Flexibiliteit		Big Fifty, Mentale Weerbaarheid (4C), Competency Check	Situational Judgement Test	Formulates explicit assumptions when information is missing, proceeds on that basis and revises the approach once new data arrives.

2 Full skill profile

Every skill in this profile, sorted by weight. The behavioural anchor under each skill belongs to the target level.

T	Skill	Target level	Weight	Knockout	Assessment method	hrmforce instrument
A	Numerical reasoning Sees in complex number series which assumptions determine the outcome and sets the calculation logic that others in the organisation follow.	■■■■■N5	5	yes	Cognitieve capaciteitentest	Ability Scan
V	Data analysis Sets the organisation's analysis standards, reviews the analyses of others and establishes new analysis methods in the profession.	■■■■■N5	5	yes	Werkproef	Ability Scan, Werkproef
K	Basic statistical interpretation Reviews the statistical basis of organisation wide decisions and trains others in the correct interpretation of results.	■■■■■N5	5	yes	Kennistoets	Ability Scan, Kennistoets (klantspecifiek)

T	Skill	Target level	Weight	Knockout	Assessment method	hrmforce instrument
V	Psychometric analysis Sets psychometric quality requirements for the instrument portfolio and accounts for validity and fairness to clients and regulators.	■■■■■ N5	5	yes	Werkproef	Werkproef, Portfolio
K	Assessment and selection methodology Determines the organisation's selection methodology, tests instruments for reliability and validity and sets guidelines for their use.	■■■■■ N5	5	no	Certificaat/diploma	Competency Check, Kennistoets (klantspecifiek)
V	Recognising AI risk and bias Examines outcomes per group or situation, identifies where the system falls short and proposes measures or extra checks.	■■■■■ N4	5	no	Werkproef	Kennistoets (klantspecifiek), Werkproef

T	Skill	Target level	Weight	Knockout	Assessment method	hrmforce instrument
V	Critical thinking and source evaluation Sets the assessment criteria for sources and claims, including for texts made by artificial intelligence, and enforces them organisation wide.	■■■■■N5	4	no	Werkproef	Competency Check, Werkproef
V	Visual communication and data storytelling Sets guidelines for visualisation and dashboard use across the organisation and judges whether displayed figures represent reality fairly.	■■■■■N5	4	no	Werkproef	Werkproef, Portfolio
G	independence Protects own professional judgement against pressure from stakeholders in senior forums and makes dissenting positions traceable and explainable.	■■■■■N5	4	no	Persoonlijkheidsvragenlijst	Big Fifty, 15PF

T	Skill	Target level	Weight	Knockout	Assessment method	hrmforce instrument
V	Instructing and explaining Sets the instruction standard for the entire field and trains others to convey complex material understandably.	■■■■■N5	4	no	Werkproef	Werkproef, 360 Feedback
V	Data visualisation Sets the organisation's visualisation guidelines and judges whether reports by others represent the data honestly.	■■■■■N5	4	no	Werkproef	Werkproef, Portfolio
V	Assessing data quality Establishes the data quality framework for the entire organisation and decides which sources count as reliable.	■■■■■N5	4	yes	Werkproef	Werkproef, Kennistoets (klantspecifiek)
V	Data modelling Sets the organisation's modelling standards and core data model and decides on deviations from them.	■■■■■N5	4	no	Werkproef	Kennistoets (klantspecifiek), Werkproef

T	Skill	Target level	Weight	Knockout	Assessment method	hrmforce instrument
V	Testing hypotheses Turns a question into a testable hypothesis, chooses the test that fits the data and states the limitations of the conclusion.	 N4	4	no	Werkproef	Ability Scan, Werkproef
K	GDPR and privacy in practice Judges in own processes whether a legal basis exists, applies data minimisation and handles requests from data subjects correctly.	 N4	4	no	Kennistoets	Kennistoets (klantspecifiek)
V	Programming Independently builds a function or module from the requirement, chooses suitable structures and keeps the code readable and tested.	 N4	4	yes	Werkproef	Werkproef, Kennistoets (klantspecifiek)

T	Skill	Target level	Weight	Knockout	Assessment method	hrmforce instrument
K	Machine learning fundamentals Explains how a model is trained and validated and judges whether reported performance figures are credible.	 N4	4	no	Kennistoets	Kennistoets (klantspecifiek)
V	Systems thinking Maps the chain around a bottleneck, points out the feedback loop and predicts the effect of an intervention.	 N4	3	no	Werkproef	Competency Check, Werkproef
V	Methodical working Chooses a suitable method for a new task, records the steps and sticks to them under time pressure.	 N4	3	no	Praktijkobservatie	Competency Check, Werkproef
V	Advisory skill Reframes the question behind the question, offers two supported options with consequences and agrees a decision moment.	 N4	3	no	Assessment center	Competency Check, Structureerd interview

T	Skill	Target level	Weight	Knockout	Assessment method	hrmforce instrument
G	Curiosity and exploring Gathers information on new methods outside the own team and brings findings into the work meeting unprompted.	 N4	3	no	Persoonlijkheidsvragenlijst	Big Fifty, 15PF, Motivatie
V	Data management and storage Independently manages data collections, plans maintenance and recovery actions and tests whether a restore actually works.	 N4	3	no	Werkproef	Kennistoets (klantspecifiek), Werkproef
V	Data governance and ownership Assigns ownership for a data domain, has definitions agreed and records decision making about data use traceably.	 N4	3	no	Structureerd interview	Structureerd interview, Portfolio

T	Skill	Target level	Weight	Knockout	Assessment method	hrmforce instrument
V	AI governance and responsible use Tests intended AI use against policy and legislation, records the trade off and arranges human oversight of decisions.	 N4	3	no	Kennistoets	Kennistoets (klantspecifiek), Structureerd interview
V	multidisciplinary collaboration Maps the issue with specialists from different disciplines and formulates a joint approach with a clear division of roles.	 N4	2	no	Assessment center	360 Feedback, Competency Check
V	Reporting and dashboard building Fills an existing dashboard or report template with current figures and checks the display for errors.	 N2	2	no	Werkproef	Werkproef, Portfolio

T	Skill	Target level	Weight	Knockout	Assessment method	hrmforce instrument
G	Dealing with ambiguity Formulates explicit assumptions when information is missing, proceeds on that basis and revises the approach once new data arrives.	 N4	1	no	Situational Judgement Test	Big Fifty, Mentale Weerbaarheid (4C), Competency Check

3 Levels per seniority

The same profile with the job family seniority adjustment applied. Target levels are clamped to 1 to 5.

Skill	medior	senior
Numerical reasoning	N4	N5

4 The proficiency scale

Level	Label	Autonomy	Complexity	Scope	Depth of knowledge
N1	Guided	works under supervision and follows instruction	routine, one variable at a time	own task	basic understanding of terminology
N2	Applying	works independently within set frameworks	familiar situations with limited variation	own role	working knowledge, applies standard approach
N3	Proficient	sets own approach and seeks input proactively	several variables, some ambiguity	own team or process	thorough knowledge, weighs alternatives
N4	Advanced	directs others and decides on the approach	complex, with conflicting interests	several teams or a department	in-depth knowledge, advises others
N5	Leading	sets the standard and the policy	strategic, under high uncertainty	organisation, value chain or profession	authority, advances the profession

5 Behavioural anchors per skill

Anchors sit at N1, N3 and N5. N2 and N4 are deliberately not anchored: raters interpolate between them, following the O*NET convention.

Skill	N1	N3	N5
Numerical reasoning Works with numbers, ratios and tables and draws conclusions from them about quantities, trends and relationships in numerical material.	Reads a simple table, names the highest and lowest value and calculates a percentage using a calculator.	Combines two data sources, calculates the development over time and explains which calculation step leads to which result.	Sees in complex number series which assumptions determine the outcome and sets the calculation logic that others in the organisation follow.
Data analysis Prepares and analyses data sets to find patterns, relationships and outliers and connects the outcomes to the original question.	Carries out a predefined analysis step on a supplied data set and records the outcome in the agreed format.	Selects analysis methods for an open question, turns raw data into a working file and supports every conclusion with figures.	Sets the organisation's analysis standards, reviews the analyses of others and establishes new analysis methods in the profession.

Skill	N1	N3	N5
Basic statistical interpretation Knows and interprets basic statistical concepts such as spread, correlation, confidence interval and significance and states what an outcome does and does not show.	Reads mean, spread and counts correctly from a table and checks what a percentage exactly represents.	Interprets correlations, confidence intervals and significance in a report and points out where cause and effect are not established.	Reviews the statistical basis of organisation wide decisions and trains others in the correct interpretation of results.
Psychometric analysis Analyses test data for reliability, validity, item functioning and norms and judges whether an instrument fits its intended use.	Computes reliability measures and item statistics as prescribed and delivers the output to the responsible researcher.	Runs item and factor analyses on a test administration, assesses norm groups and advises on revising items or scales.	Sets psychometric quality requirements for the instrument portfolio and accounts for validity and fairness to clients and regulators.
Assessment and selection methodology Selects and uses selection instruments such as tests, interviews and work samples, weighs the outcomes and substantiates an advice on suitability.	Administers a test under supervision according to the manual and records the outcomes without own interpretation.	Independently combines test results and interview data into a substantiated advice and discusses it with candidate and client.	Determines the organisation's selection methodology, tests instruments for reliability and validity and sets guidelines for their use.
Recognising AI risk and bias Recognises where an AI system works systematically skewed or unreliably for groups or situations and names consequences and possible measures.	States that AI output can be skewed by the data used and refers striking outcomes to a colleague.	Examines outcomes per group or situation, identifies where the system falls short and proposes measures or extra checks.	Sets the assessment frameworks for AI fairness and risk and decides whether a system may remain in use.
Critical thinking and source evaluation Tests claims for logic, evidence and the interest of the source and thereby distinguishes facts from opinions and assumptions.	Asks what a claim is based on and checks whether the source is named and can be found.	Detects fallacies and selective evidence in reports and states which conclusion the data do support.	Sets the assessment criteria for sources and claims, including for texts made by artificial intelligence, and enforces them organisation wide.

Skill	N1	N3	N5
Visual communication and data storytelling Presenting figures and processes in charts, graphs and diagrams that support the message and lead the reader to the correct conclusion.	Creates a chart in an existing template, adds a title and names the unit shown on the axis.	Chooses a fitting chart type per message, removes unnecessary styling and writes the conclusion above the figure.	Sets guidelines for visualisation and dashboard use across the organisation and judges whether displayed figures represent reality fairly.
Independence Forming and maintaining an own position on the basis of own judgement, even when the environment or an authority expects something different.	Forms an own opinion on a familiar issue and compares it with the advice of a colleague.	Takes a decision that departs from the group line, explains the reasoning behind it and accepts the consequences.	Protects own professional judgement against pressure from stakeholders in senior forums and makes dissenting positions traceable and explainable.
Instructing and explaining Explains a task or topic so the other can perform it independently, matches the starting level and checks whether the explanation was understood.	Demonstrates a simple operation following the instruction card and asks whether the other can copy it.	Builds an explanation up in steps, uses examples from the work of the other and has the task performed as a check.	Sets the instruction standard for the entire field and trains others to convey complex material understandably.
Data visualisation Turns data into charts and visual displays that show the message correctly, chooses suitable chart types and avoids misleading presentation.	Creates a chart following an example, completes axes and labels and checks whether the figures are correct.	Chooses the chart type per message, removes redundant elements and explains why an alternative display would mislead.	Sets the organisation's visualisation guidelines and judges whether reports by others represent the data honestly.
Assessing data quality Checks data sets for completeness, accuracy, duplicates and timeliness, describes the defects found and determines whether the data is usable.	Works through a checklist on a supplied data set and reports missing or duplicate records to the person responsible.	Defines validation rules for a data source, quantifies the defects and advises whether the data is fit for use.	Establishes the data quality framework for the entire organisation and decides which sources count as reliable.
Data modelling Describes data and its relationships in a model with entities, attributes and keys that matches the work process.	Extends an existing data model with new fields following the applicable naming conventions and has the work reviewed.	Designs a logical data model for a defined domain, normalises where needed and discusses choices with users and developers.	Sets the organisation's modelling standards and core data model and decides on deviations from them.

Skill	N1	N3	N5
Testing hypotheses Formulates a testable assumption, chooses a suitable test or comparison, carries it out and draws a conclusion with its uncertainty.	Carries out a provided test according to a step plan and records the outcome without adding own interpretation.	Turns a question into a testable hypothesis, chooses the test that fits the data and states the limitations of the conclusion.	Designs research set ups for the organisation and judges whether conclusions of others are supported by the data.
GDPR and privacy in practice Knows privacy legislation requirements for own work, which legal basis and retention period apply and recognises when notification is required.	Processes personal data only according to the applicable work instruction and refers doubtful cases to the privacy officer.	Judges in own processes whether a legal basis exists, applies data minimisation and handles requests from data subjects correctly.	Sets privacy policy, decides on high risk processing operations and represents the organisation towards the supervisory authority.
Programming Writes, reads and improves working program code in at least one language, splits a problem into steps and tests own solution.	Adjusts existing code as directed, runs it and reports error messages that cannot be resolved alone.	Independently builds a function or module from the requirement, chooses suitable structures and keeps the code readable and tested.	Sets programming standards and language choices for the organisation and reviews others' code for quality and maintainability.
Machine learning fundamentals Knows the main forms of machine learning, the role of training data and concepts such as overfitting, validation and model performance in plain language.	States the difference between supervised and unsupervised learning and which data a model needs to learn.	Explains how a model is trained and validated and judges whether reported performance figures are credible.	Sets requirements for model development in the organisation and reviews third party models on design and evidence.
Systems thinking Describes how parts of a process or organisation influence each other, including feedback, delay and unintended effects.	Names who or what depends on the own task earlier and later in the process.	Maps the chain around a bottleneck, points out the feedback loop and predicts the effect of an intervention.	Models the interplay between departments, market and regulation and shifts the intervention to the point with the greatest leverage.
Methodical working Follows a fixed and traceable method for tasks, with steps, documentation and checks, so that others can repeat the work.	Completes the steps of a prescribed procedure in the right order and records the result.	Chooses a suitable method for a new task, records the steps and sticks to them under time pressure.	Writes the working methods for the field, has them tested in practice and revises them at fixed moments.

Skill	N1	N3	N5
Advisory skill Sharpening the question of a client and delivering a well founded recommendation in a way that the receiver adopts and implements it.	Supplies requested information and explains a standard recommendation following the fixed structure used by the team.	Reframes the question behind the question, offers two supported options with consequences and agrees a decision moment.	Advises the board on issues with conflicting interests, challenges established assumptions and safeguards the quality of advice across the organisation.
Curiosity and exploring Asks questions about the unfamiliar, seeks out new topics and perspectives unprompted and explores them further than the work strictly requires.	Asks follow up questions during an explanation about a new topic and reads the background material provided.	Gathers information on new methods outside the own team and brings findings into the work meeting unprompted.	Explores developments outside the sector systematically, connects unexpected findings and puts new themes on the agenda of the organisation.
Data management and storage Manages storage, access and lifecycle of data collections, applies changes in a controlled way and ensures backups and recovery work.	Carries out assigned maintenance tasks on a data collection and records every change in the log.	Independently manages data collections, plans maintenance and recovery actions and tests whether a restore actually works.	Determines how data storage is organised for the organisation and decides on platforms, retention methods and continuity requirements.
Data governance and ownership Records who owns and stewards which data, which definitions apply and how decisions about data use are made.	Maintains the register of data owners and definitions as instructed and reports ambiguities to the coordinator.	Assigns ownership for a data domain, has definitions agreed and records decision making about data use traceably.	Establishes the organisation's data governance model and holds executives to their role as owners of data.
AI governance and responsible use Applies rules and agreements on permitted AI use, records where AI was used and ensures people remain accountable for decisions.	Uses AI only within permitted use, shares no confidential data and states where AI was used when this is required.	Tests intended AI use against policy and legislation, records the trade off and arranges human oversight of decisions.	Drafts the organisation's AI policy, sets up its oversight and accounts for it to regulators and clients.
multidisciplinary collaboration Working with people from other disciplines by learning their language and methods and establishing shared starting points for the joint work.	Asks a colleague from another discipline what technical terms mean and summarises the answer back to them.	Maps the issue with specialists from different disciplines and formulates a joint approach with a clear division of roles.	Sets up lasting forms of collaboration between disciplines and settles conflicts between professional standards on the basis of the organisational interest.

Skill	N1	N3	N5
Reporting and dashboard building Builds recurring reports and dashboards that show the right indicators for an agreed audience and keeps their definitions up to date.	Fills an existing dashboard or report template with current figures and checks the display for errors.	Designs a dashboard together with the user, chooses indicators and definitions and processes user feedback into new versions.	Determines which management information the organisation uses and keeps definitions unambiguous across all reporting.
Dealing with ambiguity Works on when the assignment, information or division of roles is incomplete or contradictory, makes workable assumptions and tests them once more becomes clear.	Asks what is meant when an assignment is unclear and then works according to the answer given.	Formulates explicit assumptions when information is missing, proceeds on that basis and revises the approach once new data arrives.	Sets direction under high uncertainty, makes the remaining uncertainty explicit and keeps the organisation moving until a decision can be taken.

6 Assessment methods and validity

The validities are the corrected meta-analytic estimates from Sackett, Zhang, Berry and Lievens (2022) in the Journal of Applied Psychology, which replace the older Schmidt and Hunter (1998) figures. The spread matters as much as the mean: with a high SD, validity varies strongly by context.

Assessment method	rho	SD	What it is
Cognitieve capaciteitentest	0.31	0.14	Standardised test of verbal, numerical or abstract reasoning.
Werkproef	0.33	0.09	The candidate performs a representative work sample under standardised conditions.
Kennistoets	0.40	0.13	Test of declarative job knowledge, usually assembled per client.
Certificaat/diploma	-	-	Formal proof of completed education or examination.
Persoonlijkheidsvragenlijst	0.21	0.15	Self-report of behavioural preferences. At hrnforce the Big Fifty and the 15PF.
Praktijkobservatie	-	-	Structured workplace observation with a form based on behavioural anchors.
Assessment center	0.29	0.09	Multiple exercises, multiple assessors, dimension-wise scoring.
Structureerd interview	0.42	0.19	Behaviour-based interview with fixed questions and a rating scale per question.
Situational Judgement Test	0.12	0.11	Scenario with response options, scored on knowledge or behavioural tendency.

7 Assessment instruments for this job

hrnforce instrument	Skills	What it measures
Werkproef	15	Representatief werkfragment onder gestandaardiseerde condities
Kennistoets (klantspecifiek)	10	Toets van vakkennis, per klant samengesteld
Competency Check	7	Competentiebeoordeling op gedragsniveau
Portfolio	5	Beoordeling van eerder werk tegen vaste criteria
Ability Scan	4	Capaciteitentest: verbaal, numeriek en abstract redeneervermogen
Big Fifty	3	Persoonlijkheidsvragenlijst, 150 items, 25 factoren

hrmforce instrument	Skills	What it measures
Structureerd interview	3	Gedragsggericht interview met vaste opzet
15PF	2	Persoonlijheidsprofiel, korter alternatief voor de Big Fifty
360 Feedback	2	Meervoudige beoordeling op gedragsankers
Motivatie	1	Drijfveren en motivatiebronnen
Mentale Weerbaarheid (4C)	1	Mentale weerbaarheid volgens het 4C-model

8 How to use this profile

1. Agree the profile with the hiring manager before the first candidate is measured. Weights shifted afterwards make the outcome indefensible.
2. Choose the assessment method per skill from the Assessment method column. Combine at most three methods per candidate.
3. Calibrate the assessors in a two-hour session using the anchors in chapter 5. Anchors without rater training deliver little.
4. Fill in the match calculator and discuss the gaps in the development conversation. Type A and type G are selection criteria, not one-quarter development goals.

Source: hrmforce Skills Framework 2.0, version 2.0.0, built 2026-09-08.
