

Shift Leader

FF02 Operational and team management · ISCO-08 3122 · CBS 0722 Productieleiders industrie en bouw
· seniority medior · Also known as: Shift Supervisor, Production Shift Leader

Leads a production shift, monitors staffing, output and safety on the line, and hands over the status to the next shift at changeover.

During the shift the shift leader is the most senior person on the floor and decides on downtime, changeovers and adding people. The distinction from a production group leader lies in working a shift roster with a full handover and in the authority to stop the line. Selection leans on technical experience with the line, while handover between shifts and consistently enforcing safety rules under time pressure are the real risk points.

5 Behavioural anchors per skill

Anchors sit at N1, N3 and N5. N2 and N4 are deliberately not anchored: raters interpolate between them, following the O*NET convention.

Skill	N1	N3	N5
Directing and steering people Making clear to employees what is expected, giving assignments, setting boundaries and intervening when work or behaviour deviates from what was agreed.	Gives a colleague a concrete assignment with expected result and timing and checks whether the assignment is understood.	Sets expectations and boundaries per team member, addresses deviating behaviour directly and records agreements in writing.	Designs the management line for the whole organisation, addresses managers on their style and defines what good steering means here.
Planning and organising Placing activities, people and resources in time, setting priorities and arranging dependencies so that agreed results are delivered on schedule.	Makes a daily or weekly schedule for own tasks and sticks to the agreed order and times.	Plans the work of the team for several weeks, distributes tasks and reshuffles on disruptions without missing deadlines.	Sets the planning system for the organisation, links annual plan, capacity and budget and decides on conflicting claims.

Skill	N1	N3	N5
Process monitoring on the line Follows gauges, screens and product characteristics during production, compares them with the standard and adjusts or reports when a deviation threatens.	Reads the designated measurement values, records them on the form and reports values outside the green range.	Monitors several process parameters at once, sees a trend towards the tolerance limit and adjusts before rejects arise.	Determines which parameters control the process, sets up monitoring and alarms and uses the data for process improvement.
Safety awareness Continuously watches for unsafe situations and actions at work, addresses others about them and chooses the safe working method even under time pressure.	Follows the safety rules of the workplace and checks back when in doubt about an operation.	Recognises unsafe situations in own process, intervenes and addresses colleagues without bringing the work to a halt.	Sets the safety standard for the organisation, makes safety discussable at every level and steers behaviour and culture.
Monitoring progress Tracking agreements and workflows, measuring in between whether results are on schedule and adjusting in time on the basis of facts and signals.	Keeps a list of own tasks and reports to the manager when an agreement threatens to slip.	Holds fixed progress reviews with the team, compares plan with actuals and intervenes when deviations appear.	Designs the progress and reporting structure for the whole organisation and determines which indicators are tracked at each level.
Using personal protective equipment correctly Selects the protective equipment matching task and hazard, puts it on correctly and checks it for function, fit and shelf life.	Wears the prescribed protective equipment at the workplace and asks for replacement when damage is visible.	Determines per task which protective equipment is needed, checks it before use and instructs new colleagues in its use.	Sets protective equipment policy, selects suppliers on standards and wearing comfort and tracks compliance across the chain.
conflict handling Naming a difference of interest or opinion, clarifying the positions of those involved and reaching a workable agreement with them.	Reports a conflict to own manager and describes factually what happened and what was said.	Brings parties together, separates positions from interests and records the resulting agreement and its follow-up in writing.	Mediates conflicts with high stakes between departments or partners and establishes organisational policy for resolving conflict.

Skill	N1	N3	N5
giving feedback Naming concrete behaviour and its effect to another person, with a request or proposal, at a moment and in a way that keeps dialogue possible.	States after a shared task what a colleague did well and gives a concrete example with it.	Discusses unwanted behaviour with the person concerned, describes fact, effect and request, and agrees on a follow-up.	Introduces feedback as a working method across several teams, trains managers in it and monitors whether unwanted behaviour is raised earlier.
holding others to agreements Approaching others when agreements or standards are not met, naming the gap and recording a new agreement together with them.	Addresses a direct colleague about an agreement that was not met and asks when it will be done.	Also addresses colleagues outside own team about agreements, names the consequence and follows up on the new agreement.	Addresses executives and partners on compliance with agreements and anchors that practice in the organisation's way of working.
Translating direction into goals Converting strategy and vision into concrete, measurable goals and result agreements for teams and employees, with a clear ordering in time and priority.	Turns a given team goal into own tasks with a deadline and discusses this with the manager.	Translates department goals into measurable result agreements per team member and records how and when progress will be measured.	Builds an organisation wide goal structure in which strategy, annual plans and team agreements align, and sets the measurement standards.
Delegating Transferring tasks and authority to the right person with clear agreements on result, room and feedback, without taking the work back over.	Hands a clearly bounded task to a colleague and explains which result and which deadline apply.	Chooses per task who is able and allowed, agrees decision space and leaves the execution with the other person.	Defines which authorities belong at which organisational level and ensures mandates are used consistently across units.
Conducting performance conversations Preparing and holding conversations about performance and results, using factual examples, mutual checking and recorded agreements about improvement or next steps.	Prepares a conversation with two concrete examples of work and asks the manager to review it beforehand.	Conducts annual reviews independently, supports the judgement with facts and records improvement agreements with deadlines in writing.	Sets the review cycle and assessment standards for the organisation and samples the quality of recorded judgements.

Skill	N1	N3	N5
Coaching Helping employees reflect on their own behaviour and choices through questions, mirroring and feedback, so they take a next step in their work themselves.	Asks a colleague after a job what went well and what they would do differently next time.	Holds coaching conversations with open questions, names patterns in behaviour and lets the other person formulate a learning goal.	Trains managers in coaching behaviour, guides peer supervision groups and determines how coaching is deployed across the organisation.
Capacity and resource planning Matching available hours, qualifications and resources against expected workload and distributing staffing so that peaks and shortages remain manageable.	Fills in the staffing list according to the roster and reports gaps in the planning to the planner.	Calculates required hours and qualifications per period, makes a staffing plan and substantiates requests for extra capacity.	Develops the capacity model for the whole organisation, links it to demand forecasts and decides on structural use of flexible capacity.
Continuous improvement Finding, testing, measuring and sustaining small improvements in daily work, together with the people who carry out that work.	Brings improvement ideas to the work meeting and tries out a proposed small change in own work.	Organises short improvement cycles in the team, measures the effect of a change and secures what works in the work instruction.	Embeds continuous improvement as a way of working across the organisation, trains improvement coaches and reports gains to the executive team.
Planning of operational processes Distributes work, people and resources over time so that the required output or service is achieved with the available capacity.	Fills in the daily roster following the fixed planning rules and reports staffing bottlenecks to the planner.	Makes the weekly planning for a team, takes peak load and absence into account and replans when disruptions occur.	Determines the planning model for several departments and decides on capacity expansion or outsourcing of work.
Recognising and resolving machine faults Establishes where the cause of a fault lies, resolves simple defects personally and calls in maintenance for more complex failures.	Reports a fault together with its visible characteristics and shuts down the machine according to instruction.	Traces the cause of a fault systematically, resolves recurring defects personally and records the solution found.	Analyses fault patterns across installations, structurally improves the design or setting and trains fault teams in this.

Skill	N1	N3	N5
promoting psychological safety Acting so that others can voice mistakes, doubt and criticism without disadvantage, by keeping own reactions predictable and following up on what is raised.	Responds calmly when a colleague reports a mistake and thanks that person for raising it.	Explicitly asks the team for doubt and dissent, names own mistakes and reports back what was done with signals raised.	Measures across the organisation whether people feel safe to speak up and steers leadership behaviour on those outcomes.
Guiding absence and work ability Holding absence conversations, monitoring work ability and workload capacity and agreeing with occupational physician and employee on recovery and return to work.	Reports absence according to the fixed procedure and keeps contact with the absent colleague at agreed moments.	Holds absence conversations without asking for medical details and draws up an action plan with the occupational physician.	Sets the organisation wide absence and vitality policy, tracks causes across departments and steers on structural root causes.
Team development Turning a group into a collaborating team by discussing roles, mutual expectations and working agreements and by addressing tensions in the collaboration.	Takes active part in team agreements and names in the team meeting what would make collaboration easier.	Discusses roles and irritations in the team, makes working agreements and evaluates them after an agreed period.	Develops the collaboration standard between teams and departments and guides managers through deadlocked cooperation across the organisation.
Managing workload pressure Keeps an overview when the volume of work rises, chooses what goes ahead and what does not, and puts the consequences to stakeholders.	Tells the supervisor that the work does not fit the available time and follows the choice that is made.	Cuts or shifts tasks independently when busy on the basis of importance, records this and discusses consequences with clients.	Redistributes work and capacity across departments in cases of structural overload and sets norms for sustainable workload distribution.
Budgeting and cost control Draws up a budget for a task, team or project, tracks spending against that budget and intervenes when overspending threatens.	Tracks spending in the supplied overview and reports deviations above the agreed limit.	Makes the budget for an own project, follows realisation per period and proposes measures in case of deviation.	Sets the budget framework for the organisation, decides on reallocation of resources and accounts for it to the board.

Skill	N1	N3	N5
Applying a quality management system Works according to documented procedures and standards, records deviations and carries out improvement and audit actions within the quality system.	Follows the prescribed procedure in the own work and records a deviation in the reporting system.	Carries out internal audits on a process, names the cause of deviations and follows improvement measures through.	Builds the quality system of the organisation, sets the standards and represents it towards the certifying body.
Managing service levels and performance indicators Agrees measurable service and performance standards, measures the actual results and takes action when agreed levels are not met.	Reads the performance overview and reports which agreement was not met in the past week.	Draws up indicators and standards for a service, reports per period and carries out improvement actions on deviation.	Determines the system of service levels for the organisation and negotiates these with customers and suppliers.
Applying workplace organisation and 5S Arranges the workplace so that material, tools and information have fixed places, maintains that state and improves the layout step by step.	Tidies tools and material to the designated place after the shift and keeps the workplace clean.	Applies the five steps of 5S at own workplace, makes deviations visible and sustains the standard reached.	Rolls out workplace organisation across departments, links it to improvement goals and sustains compliance through audits.
Working with shift work and irregular hours Organises own work around changing shifts and irregular hours, keeps handover complete and coordinates planning and availability with the team.	Works according to the roster, arrives on time and hands over outstanding matters at the end of the shift.	Plans own work across changing shifts, allocates tasks to the part of day that suits them best and swaps carefully.	Designs roster models for the organisation, weighs continuity against workability and makes agreements with team and representation.
Reporting and dashboard building Builds recurring reports and dashboards that show the right indicators for an agreed audience and keeps their definitions up to date.	Fills an existing dashboard or report template with current figures and checks the display for errors.	Designs a dashboard together with the user, chooses indicators and definitions and processes user feedback into new versions.	Determines which management information the organisation uses and keeps definitions unambiguous across all reporting.

Skill	N1	N3	N5
Using collaboration platforms Collaborates in digital platforms by sharing files, setting up tasks and channels and following agreements on working together online.	Shares files and messages in the designated channel and follows instructions on permissions and storage locations.	Sets up channels, task boards and permissions for a team and addresses colleagues on agreements about online collaboration.	Determines organisational policy for digital collaboration and steers the introduction of new ways of working together.

6 Assessment methods and validity

The validities are the corrected meta-analytic estimates from Sackett, Zhang, Berry and Lievens (2022) in the Journal of Applied Psychology, which replace the older Schmidt and Hunter (1998) figures. The spread matters as much as the mean: with a high SD, validity varies strongly by context.

Assessment method	rho	SD	What it is
Assessment center	0.29	0.09	Multiple exercises, multiple assessors, dimension-wise scoring.
Werkproef	0.33	0.09	The candidate performs a representative work sample under standardised conditions.
Praktijkobservatie	-	-	Structured workplace observation with a form based on behavioural anchors.
Situational Judgement Test	0.12	0.11	Scenario with response options, scored on knowledge or behavioural tendency.
Structureerd interview	0.42	0.19	Behaviour-based interview with fixed questions and a rating scale per question.
Simulatie	-	-	Simulated work situation, usually digital, with standardised scoring.
360 feedback	-	-	Multiple raters around the person rate behaviour against behavioural anchors.

7 Assessment instruments for this job

8 How to use this profile

1. Agree the profile with the hiring manager before the first candidate is measured. Weights shifted afterwards make the outcome indefensible.
2. Choose the assessment method per skill from the Assessment method column. Combine at most three methods per candidate.
3. Calibrate the assessors in a two-hour session using the anchors in chapter 5. Anchors without rater training deliver little.
4. Fill in the match calculator and discuss the gaps in the development conversation. Type A and type G are selection criteria, not one-quarter development goals.
