Number series

Every series follows a single principle. You work out that principle and continue the series with one number.

1. Select the number that logically continues the series.

3 17 30 42 53 63 ?

A 1

B 2

C

D

E 1

2. Select the number that logically continues the series.

7 9 15 33 87 ?

A 2

B 2

C 2 1

D 11

E

3. Select the number that logically continues the series.

8 24 72 216 648 ?

A

B 12

C 1 2

D 1

E 1

4. Select the number that logically continues the series.

12 29 46 63 80 97 ?

A 10

B 10

C 11

D 11

E 11

5. Select the number that logically continues the series.

4 4 8 12 20 32 ?

A 2

B

C

D

E

Verbal analogies

You look for the word pair whose left word fits the left blank and whose right word fits the right blank.

6. Choose the words that fit in the blanks.

... is to Ugly as Warm is to ...

- A /
 C /
 E /

- B /
 D /

7. Choose the words that fit in the blanks.

... is to Damage as Wind is to ...

- A /
 C /
 E /

- B /
 D /

8. Choose the words that fit in the blanks.

... is to Needle as Carpenter is to ...

- A /
 C /
 E /

- B /
 D /

9. Choose the words that fit in the blanks.

... is to Court as Pilot is to ...

- A /
 C /
 E /

- B /
 D /

10. Choose the words that fit in the blanks.

... is to Chapter as Mountain range is to ...

- A /
 C /
 E /

- B /
 D /

Numerical calculation

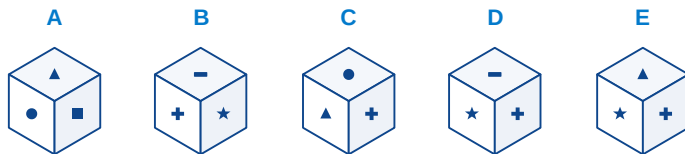

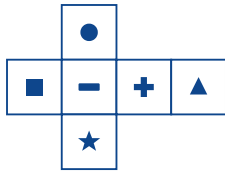

Reading figures from a work context and drawing the right conclusion: percentages, ratios, averages and unit prices. Scrap paper is allowed, a calculator is not.

11. A team handled 448 requests last quarter and 627 this quarter. By what percentage did that rise?

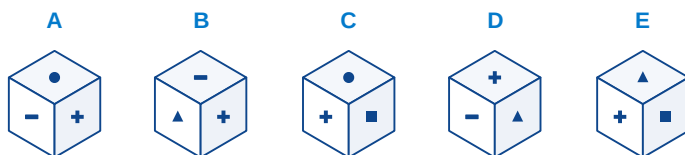

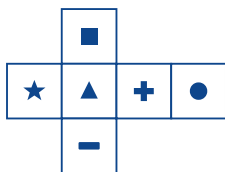

- A 2.0%
 C 2 . %
 E 1 .0%

- B 1 0.0%
 D 0.0%

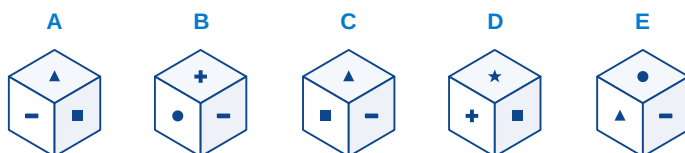

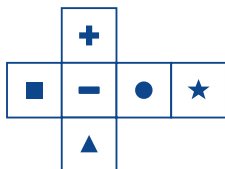

17. Which cube can be folded from this net?

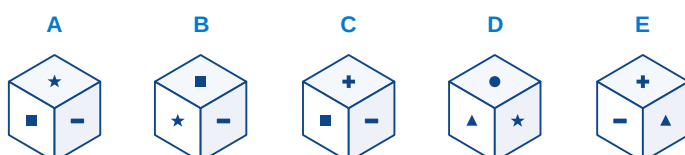

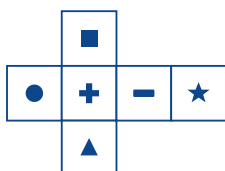

18. Which cube can be folded from this net?

19. Which cube can be folded from this net?

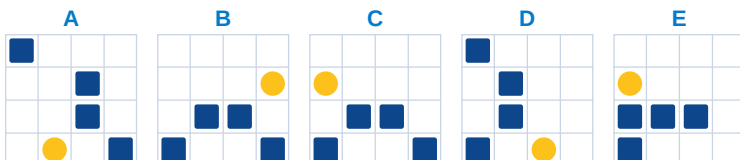

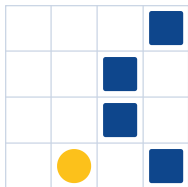

20. Which cube can be folded from this net?

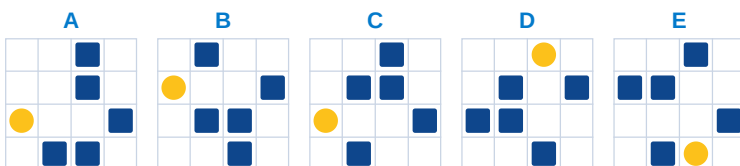

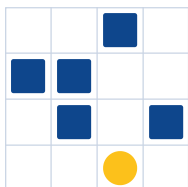

Abstract reasoning

You see a figure and look for the same figure rotated. Mirror images look very similar and do not count.

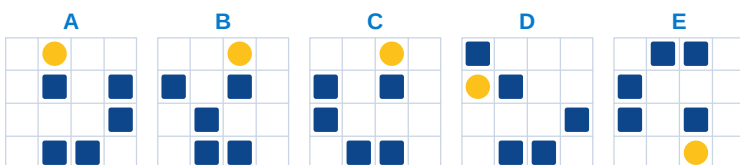

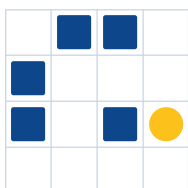

21. Which figure is the same as the one above, only rotated?

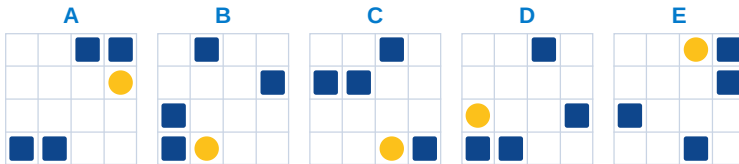

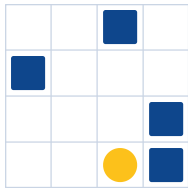

22. Which figure is the same as the one above, only rotated?

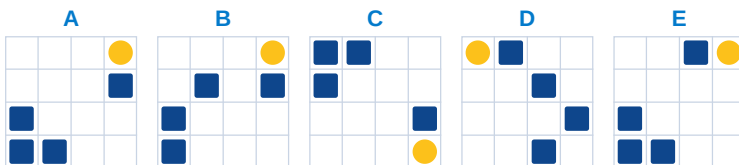

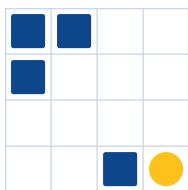

23. Which figure is the same as the one above, only rotated?

24. Which figure is the same as the one above, only rotated?

25. Which figure is the same as the one above, only rotated?

The correct answers

Only check your own answers once you have done all the questions.

Question	Correct	Explanation
1	72	The gap between consecutive numbers shrinks by 1 each time: +14, +13, +12, +11, +10. After the last number comes +9.
2	249	The gap is multiplied by 3 each time: +2, +6, +18, +54. The next step is +162.
3	1944	Each number is the previous one times 3, so 1944 follows.
4	114	Each number is 17 more than the one before, so 114 follows.
5	52	Each number is the sum of the two before it: $20 + 32 = 52$.
6	Beautiful / Cold	Beautiful goes with Ugly just as Warm goes with Cold. The relation is opposites.
7	Collision / Wave	Collision goes with Damage just as Wind goes with Wave. The left word is the cause, the right one the effect.
8	Seamstress / Hammer	Seamstress goes with Needle just as Carpenter goes with Hammer. The left word is the trade, the right one its tool.
9	Judge / Cockpit	Judge goes with Court just as Pilot goes with Cockpit. The left word is the profession, the right one the workplace.
10	Book / Summit	Book goes with Chapter just as Mountain range goes with Summit. The left word is the whole, the right one a part of it.
11	40.0%	The difference is 179. Divide by the old figure: $179 / 448 = 40.0\%$.
12	25.0%	$290 / 1,160 = 25.0\%$.
13	€ 2.00	A: € 45.00 each. B: € 47.00. Difference € 2.00.
14	97	Five times 77 is 385. Subtract the four known: $385 - 288 = 97$.
15	€ 2,736.00	$24 \times € 120 = € 2,880$. Of that, 95%: € 2,736.
16	410	Fold the net and star, triangle and circle meet at one corner, in this order. On the other four cubes, faces sit next to each other that are opposite on the cube, or they appear in the wrong rotational order.
17	435	Fold the net and star, cross and bar meet at one corner, in this order. On the other four cubes, faces sit next to each other that are opposite on the cube, or they appear in the wrong rotational order.
18	321	Fold the net and cross, square and triangle meet at one corner, in this order. On the other four cubes, faces sit next to each other that are opposite on the cube, or they appear in the wrong rotational order.

Question	Correct	Explanation
19	521	Fold the net and bar, square and triangle meet at one corner, in this order. On the other four cubes, faces sit next to each other that are opposite on the cube, or they appear in the wrong rotational order.
20	254	Fold the net and square, bar and star meet at one corner, in this order. On the other four cubes, faces sit next to each other that are opposite on the cube, or they appear in the wrong rotational order.
21	0,3;1,2;2,2;3,3 0,1	Only this figure is the original rotated by 90 degrees. The other four are mirror images or have a block in a different place.
22	1,1;1,3;2,0;2,1;3,2 0,2	Only this figure is the original rotated by 90 degrees. The other four are mirror images or have a block in a different place.
23	0,1;0,2;1,3;2,1;2,3 2,0	Only this figure is the original rotated by 270 degrees. The other four are mirror images or have a block in a different place.
24	0,3;1,3;2,0;3,2 0,2	Only this figure is the original rotated by 90 degrees. The other four are mirror images or have a block in a different place.
25	0,2;0,3;1,3;3,1 3,0	Only this figure is the original rotated by 270 degrees. The other four are mirror images or have a block in a different place.
